Analyze System: how it is put together

The analyze-system tool is a basic system security audit tool focused on data analysis and reporting. It provides a command-line interface to perform various system security

sketched from the files

Analyze System: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what Analyze System is for

WHAT IT IS

The analyze-system tool is a basic system security audit tool focused on data analysis and reporting. It provides a command-line interface to perform various system security check.

WHAT GOES IN

The files at the top of the tree: main.py, README.md, LICENSE.

WHAT COMES OUT

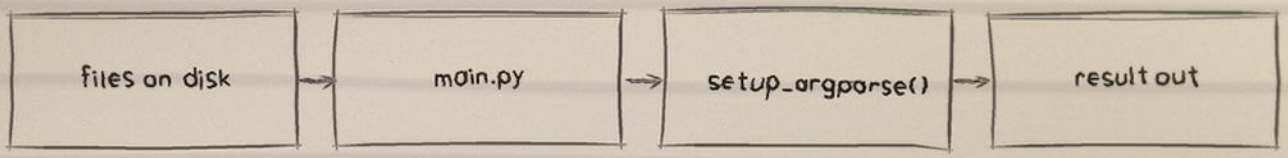

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Analyze System: data flow, in one direction

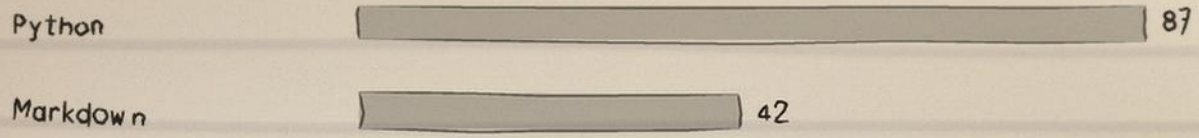

One direction. Anything the code does not do is not drawn.

Second sheet,

Analyze System in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.

4 commits, first 2025-01-01, last 2025-01-01, from the local git log.

No test files by name in this snapshot.

counted and drawn, GK

Analyze System: schematic of the apparatus

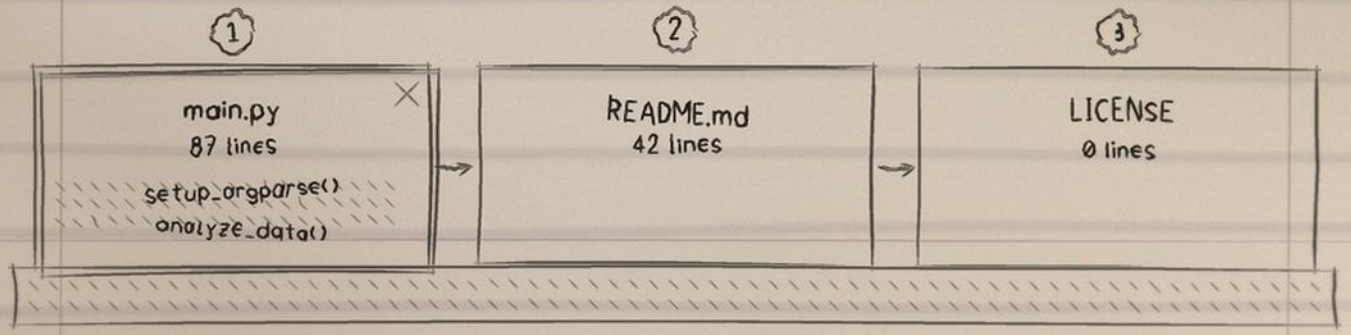

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 129 lines counted

turns of the crank so far: 4 commits, 2025-01-01 to 2025-01-01

measured and sketched, GK
